SQL Server DBA Exercises-4

Export & Import Data

1. Using the export and import wizard, export the Products table to a csv file in c:\Data\Prod.CSV

2. Using the export and import wizard, export the orders table to a tab separated text file called c:\Data\Orders.TXT

3. Create a new and empty database called TEST_IMP

4. Create two empty tables: Products and Orders in the database by using the SELECT INTO command and the NORTHWIND tables.

5. Using the BCP utility, import from Prod.CSV to the Products table in TEST_IMP database

6. Using BULK INSERT, import the Orders.txt file to Orders table in TEST_IMP database
